If you think it could be useful, I'll be happy to meet with them (or have a further conf call) to continue discussion of all the numbers and tech details.

Subject: Ngo call

We just wrapped up a 1 hour 45 minute call with the 4 major ngo's. They were not happy with 11 percent plus the likely 10 percent unavoidable cap number. Ned sullivan of scenic hudson early on described the plan as terrible and a complete rejection of the goals of the rod. As we got into q and a the criticism was less strident. We talked at length about the capping happening after dredging and that getting 95 percent mass removal from designated dredging areas was quite good. I further walked them through the difference in acreage capped under various capping scenarios. They thanked us for our transparency. Manna green from clearwater who has always been the most engaged and pushing the hardest for the dredging project seemed the most agreeable. Nrdc was fairly quiet. I explained why this is best for the river and that our numbers were based on science and why I think this is a good place for all of us to be and our deep desire not to have further delays. I don't think they will embrace the proposal but their critique will be more informed had we not done the call. Walter did a great job with the technical questions. It was mostly polite, and to all a good night. judith
